Andrew Isles Natural History Books is pleased to be supporting the annual competition for the Best Student Paper published in the EMU. We would like to congratulate the 2006 joint winners Steve Murphy (Australian National University) and Beth Schlotfeldt (Flinders University). A selection of books was sent to both winners.

Recent evolutionary history of New Zealand's North and South Island Kokako (*Callaeas cinerea*) inferred from mitochondrial DNA sequences.

S. A. Murphy, I. A. Flux and M. C. Double
pp. 41-48

Adaptive divergence in the Superb Fairy-wren (*Malurus cyaneus*): a mainland versus island comparison of morphology and foraging behaviour.

Beth E. Schlotfeldt and Sonia Kleindorfer
pp. 309-319

To read the winner's papers please visit the EMU website at:

Emu - Austral Ornithology is a major journal for the publication of research articles and reviews in all branches of ornithology. It has a proud tradition of publishing papers on many aspects of the biology of birds. Papers highlighting the conservation and management of birds are particularly welcomed. The Journal's emphasis is on studies relating to the Southern Hemisphere and adjacent tropics. *Emu - Austral Ornithology* is for professional ornithologists, research scientists, resource managers, students and amateurs interested in any aspect of the biology and management of birds.
